

SAM

Standard Approach Mesh

Pre-contoured titanium mesh implants

Oral and maxillo-facial surgery is our passion! Its further development, together with our customers, is our ambition. Every day we work on developing innovative products and services which meet the highest demands on quality, and which contribute to the wellbeing of the patient.

SAM – Standard Approach Mesh Pre-contoured titanium mesh implants

Benefits

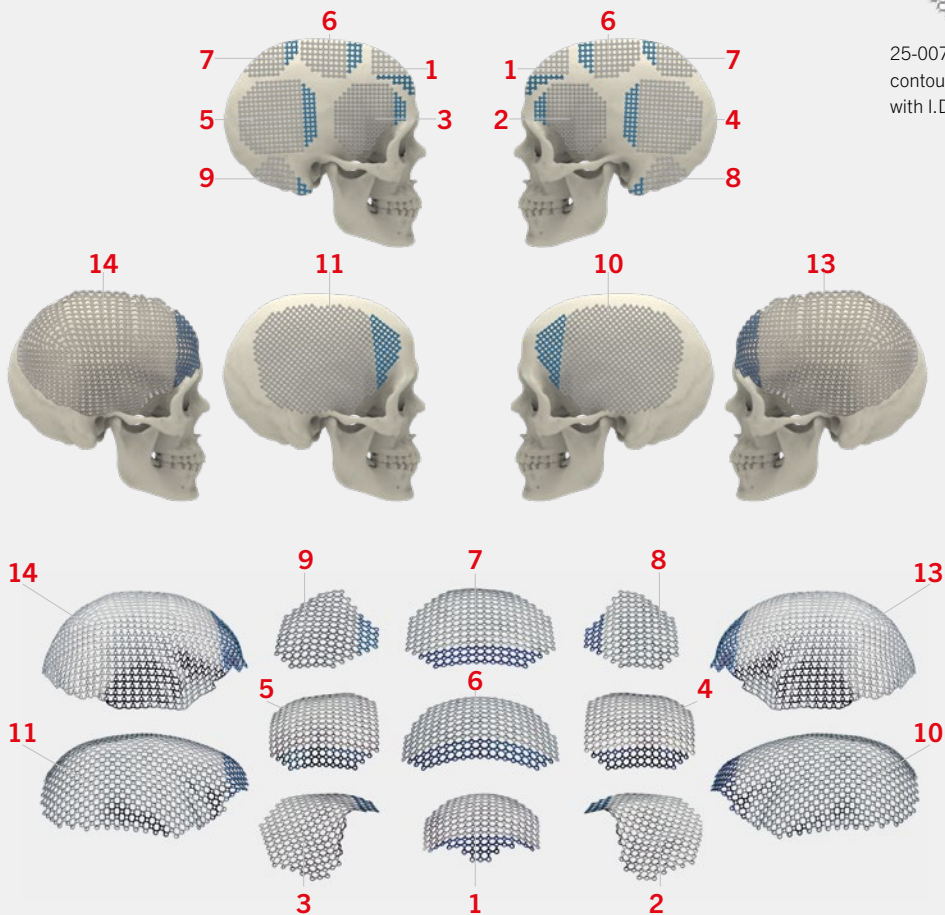

- Pre-contoured titanium mesh implants and templates for 11 standard neurosurgical approaches
- Mesh sizes and shapes were created using a compilation of adult CT scans to develop the best possible “average” fit
- 0.6 mm thick titanium: rigid, yet able to modify slightly to match each patient’s specific anatomy
- Used in conjunction with KLS Martin Drill-Free 1.5 mm Neuro maxDrive® screws
- Each implant comes with detachable identification tag to aid in orientation and to maximize inventory control (see below)
- Also available in sterile version

Blue color designates frontal direction of mesh
